Sheikh Khalifa Medical City Ajman Maternity Packages

مدينة الشيخ خليفة الطبية | عجمان
SHEIKH KHALIFA MEDICAL CITY | AJMAN

Welcome to Sheikh Khalifa Hospital – Women and Children!

When a woman is expecting a baby, both mother and child need special care before, during and after birth.

Pregnancy and maternity care are focused on ensuring that the mother and child are healthy, reducing risks during pregnancy and having a safe delivery.

The healthcare we provide focuses on a pregnancy care program, available for every pregnant woman which can significantly improve a variety of health outcomes for both mother and child.

We offer clinics on various aspects of pregnancy, including: antenatal education; empowering patients and families; specialized services providing advanced diagnostics and treatment for maternal and fetal complications, combined with a competent delivery service and neonatal care embedded in a continuous pathway. Partnering with Rashid Center for Diabetes and Research, we also offer an Antenatal Diabetic Clinic providing optimal care for our patients.

Our team of experienced obstetricians, midwives and nurses will provide you with high quality care and a service to prepare you and your family for the birth of your child.

"We look forward to supporting your family
in this important time of life!"

Packages

The Enty Al Hayah Clinic was established to provide education for women about pregnancy, delivery and the care of their baby. Our vision is to make all mothers feel welcome and that it's a clinic they can turn to at any time for support.

Husbands are encouraged to be involved and present at the deliveries of their children. Our Midwifery led lectures help prepare mothers for labor, including pain relief, breathing exercises, changing positions and any other topics which are a concern during the pregnancy. It also includes preparation for breastfeeding and caring for a neonate as well as visits to the labor ward.

- 01 | Antenatal Care Package
- 02 | Normal Vaginal Delivery Package
- 03 | Lower Segment Caesarean Section (LSCS) Package
